EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John McConaghy on September 14, 2004.

The application has been amended as follows:

SPECIFICATION

On page 3, line 13, the term "as" has been changed to -- like --.

CLAIMS

4. The firefly simulation device of claim [1] 3, the second depending flexible line segment being a second twisted pair of wires electrically coupled between the first twisted pair of wires and the LED.

7. A firefly simulation device comprising
a first depending flexible line segment including a twisted pair of wires electrically coupled with the fan;

a motor driven fan mounted to swing freely at the distal end of the first depending flexible line segment, the fan capable of inducing thrust substantially in a plane normal to the first depending line segment;

a second depending flexible line segment depending from the motor driven fan including a twisted pair of wires electrically coupled between the fan and [the] a LED;

[a] the LED is positioned at the distal end of the second depending flexible line segment having a body and a light transmitting opening which can be eclipsed by the LED body.

The following is an examiner's statement of reasons for allowance: the prior art of record does not teach nor suggest firefly simulation device comprising a first flexible line segment, a motor driven fan mounted to swing freely from the distal end of the first line segment, a second flexible line segment depending from the fan and a LED at the distal end of the second line segment. Hill, U. S. Patent 6,196,803 was cited to show a flexible cord or chain supporting a fan. However the fan taught by Hill comprises three cords or chains 48, 50, and 52 for supporting the fan, wherein the chains or cords limit or stabilize the movement of the fan.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cassandra Davis whose telephone number is 703-308-2223. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lesley Morris can be reached on 703-308-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
